Property Records Education Partners (PREP) is a public/private partnership formed for recorders, title companies, real estate brokers and agents, escrow agents, lenders, underwriters, vendors, and other sectors of the real estate industry to improve local relationships by opening and enhancing lines of communication, creating networking channels, and expanding educational opportunities.

By participating in a PREP Chapter, you have the opportunity to discuss industry issues and find solutions to problems at the local level. By networking nationally through the Property Records Industry Association (PRIA), PREP Chapter participants will become better informed about industry issues and enjoy a stronger voice when addressing legislation, electronic recording and standardization concerns.

PREP Chapters do not have membership dues, and each chapter determines its leadership, meeting schedule and agendas. All that is required is your participation – the more the better.
